**Statement from Attorney Jan Schlichtmann on behalf of the
Massachusetts Turnpike Toll Equity Trust**

“We are pleased that the Turnpike Authority has clearly established to the Court that it has a stunning amount of assets, in excess of \$7 billion, which are more than sufficient to repay toll payers who have unfairly borne the burden of the Big Dig. Our case will now proceed on its central premise that the current tolling system is clearly inequitable and must be fixed we will be moving to establish a class and begin discovery next week. At the same time, it is critical that the Legislature and Governor Patrick show true leadership now by including toll equity in the transportation reform package expected next week.”
